

The 8 Principles of More Human Leadership

- **Crossing the bridge from “I” to “We”** - *It can't be about you – it's about a team*
- **Asking for trust and keeping your promises** - *Integrity is an absolute must*
- **Establishing a mantra of key values** - *It's the glue that holds all of us together*
- **Finding and teaching more human leaders** – *The legacy must be passed on; we can't do it ourselves*
- **Building a culture of accountability** – *It's all about fairness and shared responsibility*
- **Measuring, monitoring and managing with the right metrics** – *The team needs to know where they stand, and what they are aiming for*
- **Fighting complacency and the naysayers** – *Inertia is a momentum killer, as well as those who still desire the old ways*
- **Connecting it all to a higher purpose** – *Humans want to be a part of a meaningful cause that's bigger than themselves*
